JUMBO DOUBLE PUMP

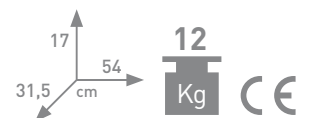

Professional
stainless steel machine

The patented **Lock & Unlock System** device guarantees convenience of use, by locking and releasing the bag introduction area, to perform an automatic packing cycle and reduce hands-on time. The **Lock & Unlock System** is also fitted with a gas spring for **gentle** lid opening

- 1 Patented **Lock & Unlock System**
- 2 impermeable keyboard with multifunction **Soft Touch** controls
- 3 Vacuum value **analogue** indicator
- 4 Accessory socket (for containers, stopper, etc.)
- 5 Switch with socket for detachable power cord
- 6 Extra large '**guaranteed hold**' seal
- 7 Sealing bar with cooling system for intensive use
- 8 **Pull-out washable** condensate tray
- 9 Powdered foods (e.g. flour, coffee, sugar) **safe-pump** filter
- 10 **Oversize** rubber feet

Code V702PK1
Master carton: 1 piece

JUMBO

Professional stainless steel machine

TECHNICAL FEATURES

- Powerful air extraction using a self lubricating double pump
- Nominal pump flowrate in litres/minute: 31.5 (approx)
- Pump vacuum level in bar - 0.85 (approx)
- Max. output in Watt: 380 (approx)
- Suitable for heavy duty use

KEYBOARD FUNCTIONS

- A** Fully automatic cycle (automatically extracts air and seals)
- M** Manual cycle, the machine extracts the air until the **S** button is pressed.
- S** Manual sealing (press to interrupt air extraction and seal immediately) cycle recommended for storage of fragile foods using bags.
- T** Three-level sealing time settings (very useful when using wet bags)
- C** For creating vacuums in containers
- M** For rapid marinating

AUTOMATIC MARINATING FEATURE
