ETHOS

Replacing Single-Use Food Storage
with Reusable, Sustainable Innovation

intertek
Total Quality. Assured.

Sustainability

50% Recycled Plastics

We support new recycling technologies that transform hard-to-recycle materials into new plastic. Crafted from biomass-based ingredients such as used cooking oil or waste vegetable oils which are processed into renewable hydrocarbons and then propylene to create bio-based PP. This eco-friendly process reduces reliance on fossil fuels to lower carbon emissions and a smaller environmental footprint. No less than 50% recycled materials are blended with non-recycled material in an ISCC Certified mass balance approach, creating a durable, impact resistant and long-lasting food safe material.

TAKE OUTS

Hospitality Food Storage

Product Features

- **Made with 50% ISCC+ certified, traceable recycled material** derived from plant-based waste cooking oil and feedstocks.
- **Crafted from renewable resources**, reducing reliance on fossil-based materials.
- **Lower carbon footprint**, contributing to reduced environmental impact.
- **BPA-free** for safe food contact.
- **100% food-grade construction** meeting strict safety standards.
- **Microwave and freezer safe**, suitable for a wide range of kitchen applications.
- **Dishwasher safe**, tested to withstand up to **125 wash cycles**.
- **FSC-certified, fully recyclable packaging** designed for responsible disposal.

Currently available in 3 sizes:

600ml Rectangle

1000ml Rectangle

2000ml Rectangle

 100% Food Grade

 Microwave Safe (Without Lid)

 Dishwasher Safe (125 cycles)
