WHY CHOOSE

Bistro

Expertly crafted for the foodservice industry, Maxwell & Williams Bistro is purpose-built for high-turnover commercial settings, delivering durability, efficiency and timeless style across every area of foodservice.

PRECISION MANUFACTURING

Maxwell & Williams Bistro is crafted with precise dimensional control and minimal warping, ensuring consistent sizing and dependable stability.

HOSPITALITY FRIENDLY DESIGN

Engineered to meet the demands of the foodservice industry, offering convenience without compromising on strength or performance.

UNIVERSALLY COMPATIBLE

Designed to integrate seamlessly into all kitchen environments— from restaurants and hotels to cafés and on-site catering.

10 YEAR CHIP RESISTANCE GUARANTEE

Backed by a 10-year chip-resistance guarantee, offering lasting confidence in high-use hospitality environments.

DESIGNED FOR EFFICIENT STORAGE

Expertly designed in collaboration with hospitality professionals, ensuring space-efficient storage and reliable performance in high-demand commercial settings.

SPACE SAVING STACKABILITY

A consistent shape and structure allow for safe, compact stacking, making it ideal for maximising space in kitchens, shelves and dish racks.

FEATURES AND BENEFITS

OVEN SAFE

Withstands thermal shock up to 240°C, exceeding the Australian Standard® threshold of 180°C, making it perfect for oven-to-table service

MICROWAVE SAFE

Engineered to be microwave compatible, allowing for safe and efficient reheating without compromising the integrity of the product.

FREEZER SAFE

Built to endure low temperatures without cracking or weakening, ideal for cold storage and food prep workflows.

DISHWASHER SAFE

Durable enough for repeated commercial dishwashing cycles, ensuring easy cleanup and long-term performance.

HIGH EDGE CHIPPING RESISTANCE

Expertly engineered with durable materials and precise craftsmanship to ensure long-lasting edge strength and reliability.

HIGH FIRING TEMPERATURE

Fired at 1350°C, which is significantly higher than the standard porcelain range. This process creates a dense, vitrified body with a smooth, durable glaze and exceptional resistance to cutlery marks and surface wear.

HIGH ALUMINA CONTENT

Formulated with 30% Aluminium oxide. This enhances structural strength, improves resistance to thermal shock and chip resistance.

LOW WATER ABSORPTION FOR SUPERIOR PERFORMANCE

Maxwell & Williams Bistro features an ultra-low water absorption rate of just 0.01%, significantly outperforming the Australian Standard® benchmark of 0.4%.

This critical feature plays a key role in the performance, safety and longevity of the product in hospitality settings.

Why Low Water Absorption Matters In Hospitality Ceramics:

HYGIENE ASSURANCE

Ultra-low absorption reduces the retention of moisture, significantly lowering the risk of bacterial growth, odors and stains, ensuring clean and safe tableware for every service.

ENHANCE DURABILITY

Reduced porosity strengthens the body of the dinnerware, offering greater resistance to cracking, crazing and thermal shock under intense commercial use.

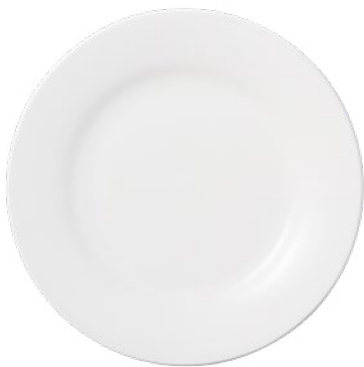

EXTENDED LONGEVITY

Withstand frequent dishwasher cycles, soaking and temperature fluctuations without structural compromise ideal for high-turnover environments.

HOSPITALITY FRIENDLY DESIGN

Engineered to meet the demands of the foodservice industry, offering convenience without compromising on strength or performance.
